

Figure: Hazard model diagnostics suite (discrete-time logit, Cox PH, GLMM frailty)

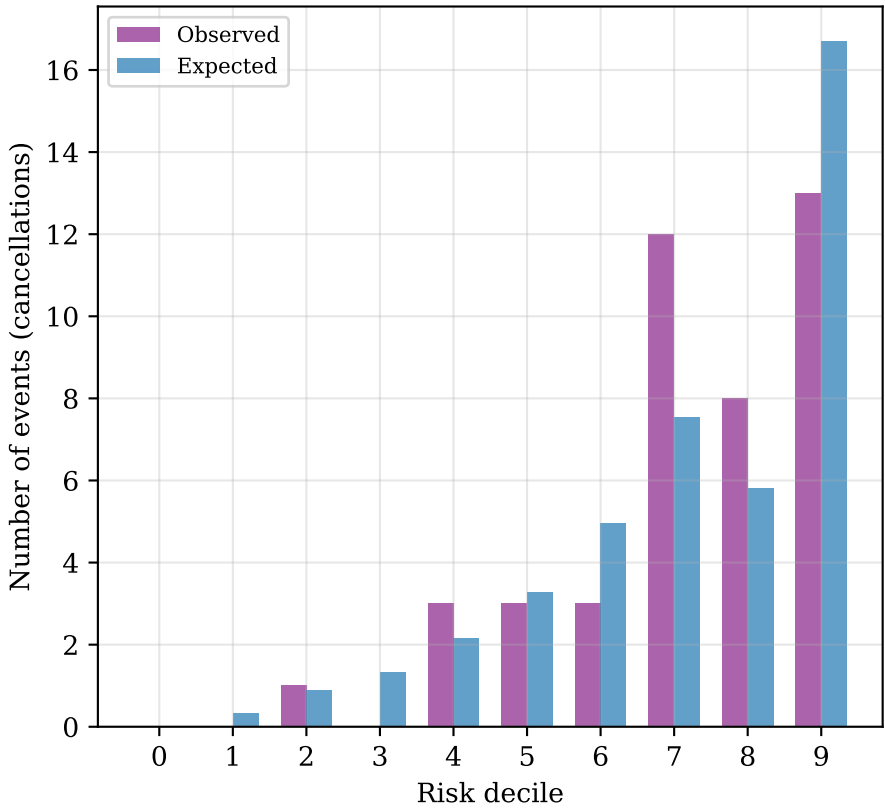

Panel A: ROC curve

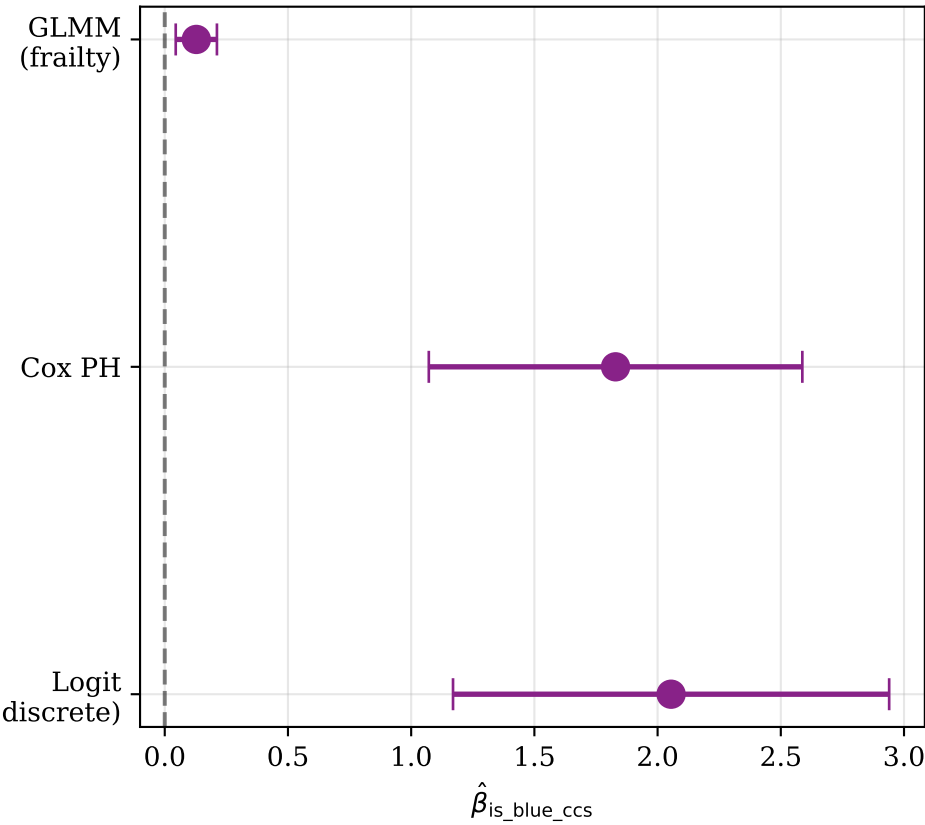

Panel B: Calibration plot
slope = 0.89 (ideal 1.00)

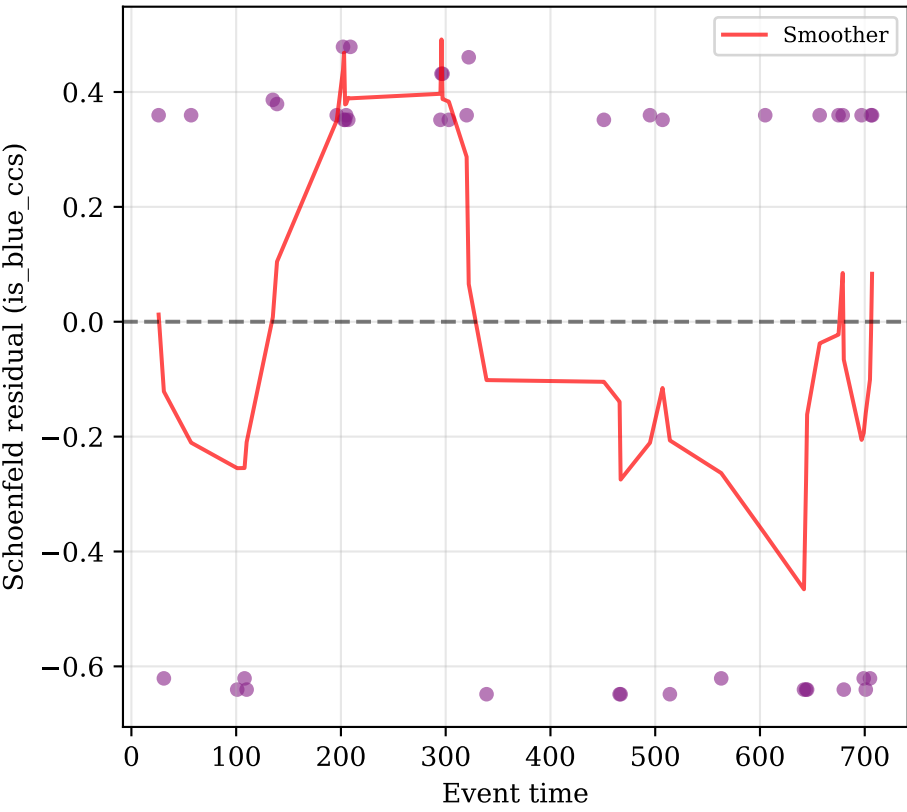

Panel C: Hosmer-Lemeshow
 $\chi^2=7.8$, $p=0.454$

Panel D: Coefficient across model classes

Panel E: Schoenfeld residuals
is_blue_ccs PH test $p=0.374$

Panel F: Predicted distribution by class
Brier = 0.0518
